

Natural Deduction .

Rules for implication.

Modus Ponens.

$$\frac{\phi \quad \phi \rightarrow \psi}{\psi} \rightarrow e$$

if today is wednesday then there will be a quiz.  
 $P \rightarrow Q$

Today is wednesday.

Conclusion: Therefore there will be a quiz.

Curry - Howard Correspondence .

if  $F$  is a function from  $P \rightarrow Q$  and

$x$  is of type  $P$  then  $Fx$  is of type  $Q$ .

Example.

$$P \rightarrow (Q \rightarrow R), P \rightarrow Q, P \vdash R$$

1.  $P \rightarrow (Q \rightarrow R)$  premise
2.  $P \rightarrow Q$  premise .
3.  $P$  premise .
4.  $Q \rightarrow R$   $\rightarrow_e$  1, 3
5.  $Q$   $\rightarrow_e$  2, 3
6.  $R$   $\rightarrow_e$  4, 5

Modus Tollens.

Suppose  $P \rightarrow Q$  and  $\neg Q$

if  $P$  holds then use  $\rightarrow_e$  to conclude that  $Q$  holds.

Conclusion:  $\neg P$  is true

$$\frac{\phi \rightarrow \psi \quad \neg \psi}{\neg \phi} \text{MT}$$

Example.

$$P \rightarrow (Q \rightarrow R), P, \neg R \vdash \neg Q$$

- |    |                                   |                 |           |
|----|-----------------------------------|-----------------|-----------|
| 1. | $P \rightarrow (Q \rightarrow R)$ | }               | Premises. |
| 2. | $P$                               |                 |           |
| 3. | $\neg R$                          |                 |           |
| 4. | $Q \rightarrow R$                 | $\rightarrow_e$ | 1, 2      |
| 5. | $\neg Q$                          | MT              | 4, 3      |

Example .

$$P \rightarrow \neg Q, \quad Q \vdash \neg P.$$

$$\begin{array}{l} 1. \quad P \rightarrow \neg Q \\ 2. \quad Q \end{array} \quad \left. \vphantom{\begin{array}{l} 1. \\ 2. \end{array}} \right\} \text{premises.}$$

$$3. \quad \neg \neg Q \quad \neg \neg i \quad 2$$

$$4. \quad \neg P \quad MT \quad 1, 3$$

$$p \rightarrow q, \neg q \vdash \neg p$$

$$p \rightarrow q \vdash \neg q \rightarrow \neg p.$$

Suppose  $p \rightarrow q$  holds.

Assume that  $\neg q$  holds, using TNT we can infer  $\neg p$

Given the premise  $p \rightarrow q$ , Assuming  $\neg q$  we can infer  $\neg p$   
 $\neg q \rightarrow \neg p.$

1.  $p \rightarrow q$  Premise.

2	$\neg q$	Assumption
3	$\neg p$	TNT 1, 2

4  $\neg q \rightarrow \neg p \rightarrow i$  2-3

Rule - implication introduction.

$$\frac{\begin{array}{|c|} \hline \phi \\ \vdots \\ \psi \\ \hline \end{array}}{\phi \rightarrow \psi} \rightarrow i.$$

Example.  $\neg q \rightarrow \neg p \vdash p \rightarrow \neg \neg q$

1.  $\neg q \rightarrow \neg p$  Premise.

2.  $p$  Assumption

3.  $\neg \neg p$   $\neg \neg i$  2

4.  $\neg \neg q$  MT 1,3

5.  $p \rightarrow \neg \neg q$   $\rightarrow i$  2-4

# Theorems.

Example.

Formulas  $\phi$  with valid sequent  $\vdash \phi$

$$\vdash (q \rightarrow r) \rightarrow ((\neg q \rightarrow \neg p) \rightarrow (p \rightarrow r))$$

1.	$q \rightarrow r$	Assumption
2.	$\neg q \rightarrow \neg p$	Assumption
3.	$p$	Assumption
4.	$\neg p$	$\neg \neg i$ 3
5.	$\neg \neg q$	MT 2,4
6.	$q$	$\neg \neg e$ 5
7.	$r$	$\rightarrow e$ 1,6
8.	$p \rightarrow r$	$\rightarrow i$ 3-7
9.	$(\neg q \rightarrow \neg p) \rightarrow (p \rightarrow r)$	$\rightarrow i$ 2-8
10.	$(q \rightarrow r) \rightarrow ((\neg q \rightarrow \neg p) \rightarrow (p \rightarrow r))$	$\rightarrow i$ 1-9

## Example

$$P \wedge q \rightarrow r \vdash P \rightarrow (q \rightarrow r)$$

1.	$P \wedge q \rightarrow r$	Premise
2.	$P$	Assumption
3	$q$	Assumption
4	$P \wedge q$	$\wedge i$ 2,3
5	$r$	$\rightarrow e$ 1,4
6	$q \rightarrow r$	$\rightarrow i$ 3-5
7	$P \rightarrow (q \rightarrow r)$	$\rightarrow i$ 2-6

## Example

$$P \rightarrow (Q \rightarrow R) \vdash P \wedge Q \rightarrow R$$

1.  $P \rightarrow (Q \rightarrow R)$  Premise

2.  $P \wedge Q$  Assumption

3.  $P$   $\wedge e_1$  2

4.  $Q$   $\wedge e_2$  2

5.  $Q \rightarrow R$   $\rightarrow e$  1, 3

6.  $R$   $\rightarrow e$  5, 4

7.  $P \wedge Q \rightarrow R$   $\rightarrow i$  2-6

Rules of disjunction.

$$\frac{\phi}{\phi \vee \psi} \quad \vee i_1$$

$$\frac{\psi}{\phi \vee \psi} \quad \vee i_2$$
