### Question 6

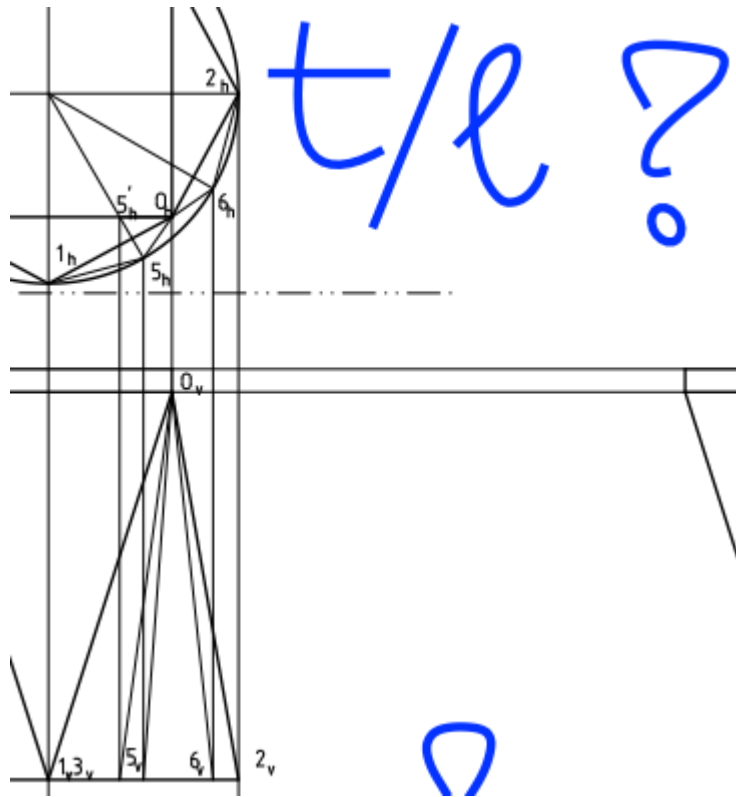

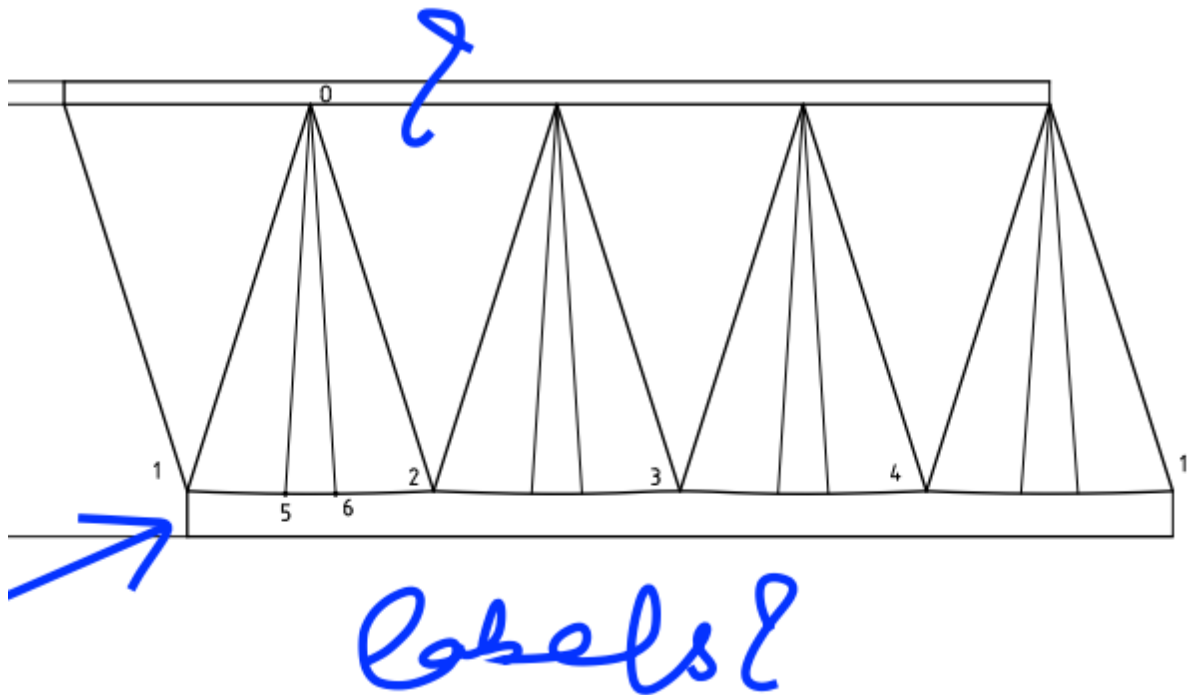

Fig.1

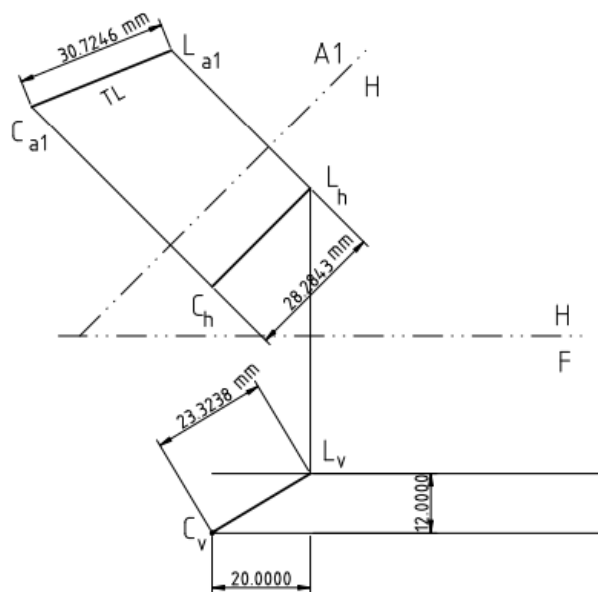

Fig.2

Sir I have shown the true length of O5 . Since O5 and O6 were of same length , calculating TL of O5 suffices.Hence I have only shown the TL of O5.In the Fig.2 I have marked the  $O_v5_v$  and the TL of O5 with red color.Sir I also have labelled the points with numbers.

## Question 2

Marks: 10/15  
 -CvLv is not appropriate  
 -TL is not correct  
 -Ca1La1 position is not correct  
 -gradient considered is inappropriate

Sir I have shown the correct slope for the line in F view.  $12/20 = 0.6$

Slope was 0.6 and the line was sloping upwards. Hence I have shown that the line has slope 0.6 when seen from F view.
